

Severn Trent Water

Service: Access Audits
Location: The Midlands

Project Overview:

Evans Jones was appointed to carry out an access audit of 6 reservoir sites owned and maintained by Severn Trent Water, over a 4 week period.

Following completion we were also retained to provide a 1/2 day training course for the property team and site managers.

Challenges:

The diverse nature of the sites presented many challenges such as establishing appropriate disability standards and interpreting these for use on sites that were largely unstructured rural landscapes.

We were required by the client to establish appropriate standards and apply these to both the natural landscape and the more structured visitor centres at the larger sites.

The Results:

Following completion of the audit we provided a training session for the on site property teams to help them understand and interpret results.

“A very good service from start to finish, clear and detailed reports, delivered on time. Thank you.”

Ben Young, Severn Trent Water
